

Fine Motor Skills Practice

Strengthening hands, fingers, and coordination for everyday activities

ACTIVITY 1: Pencil Grip Check

Before starting, check pencil grip. The correct grip uses thumb, index, and middle finger — called the 'tripod grip'. Ask your child to hold the pencil and circle what you see:

■ Tripod grip (thumb + 2 fingers) — correct!

■ Fist grip (all fingers around pencil)

■ Thumb wrap (thumb over fingers)

■ Lateral pinch (pencil between fingers)

ACTIVITY 2: Tracing Practice

Trace each shape below using a pencil. Go SLOWLY and try to stay on the line.

Straight line: _____ (trace it!)

Zig-zag: /\/\/\ (trace it!)

Circle: Draw a circle inside this box ↓

Square: Draw a square inside this box ↓

ACTIVITY 3: Cutting Practice Guide

Scissor skills develop in stages. Check off the level your child is at:

■ Level 1: Snipping — single snip across a strip of paper

■ Level 2: Fringe cutting — repeated snips along the edge

■ Level 3: Cutting across paper — straight line across a full sheet

■ Level 4: Cutting on a line — following a straight drawn line

■ Level 5: Cutting curves — following a curved line

■ Level 6: Cutting shapes — squares, triangles, circles

ACTIVITY 4: Daily Fine Motor Log

Record fine motor practice this week:

Day	Activity practiced	Duration	Notes
